IAE STUDY

Airports Developments Worldwide

Executive Summary

Global airport infrastructure is expanding rapidly to accommodate projected passenger growth doubling by 2040, with over \$700 billion invested in more than 50 major projects. These developments address outdated facilities built decades ago, focusing on mega-hubs in Asia, the Middle East, and emerging markets. Key trends include capacity boosts, sustainability upgrades, and advanced tech integration.

Market Overview

Airports face surging demand as air travel rebounds post-pandemic, with many legacy hubs unable to handle modern volumes. Investments target tourism, economic hubs, and low-cost carrier growth, especially in Asia-Pacific and Africa. Total global spending exceeds \$700 billion, driven by projects aiming for 100+ million annual passengers.

Project Name	Location	Capacity (Passengers/Year)	Cost	Completion Timeline	Key Features
King Salman International	Riyadh, Saudi Arabia	185 million by 2050	\$30B	Phased to 2035	57 sq km site; 5 runways; replaces King Khalid.
Al Maktoum International	Dubai, UAE	260 million	\$35B	2030-2032 (Phase 1)	36,000 acres; 5 runways; 400 gates.
Long Thanh International	Vietnam	100 million	\$12.8B	Phase 1: June 2026	4 runways; high-speed rail links.
Western Sydney (Nancy-Bird Walton)	Australia	Not specified	Not specified	Ongoing	24/7 operations for regional growth.
Istanbul Airport Expansion	Turkey	Expansion phase	Not specified	Ongoing	New terminal; 4th runway; cargo city.
Bishoftu International	Ethiopia	Not specified	\$12.7B	Ongoing	Africa's largest aviation project.
New Manila International	Philippines	Supports LCC growth	Not specified	2028	Handles Cebu Pacific demand.
Dallas Fort Worth Terminal F	USA	200+ flights/day	Not specified	Q4 2026	New 121,920m ² terminal.

Regional Highlights

Middle East

Saudi Vision 2030 and Dubai expansions lead with massive scales for tourism.

Asia-Pacific

Vietnam, Philippines, and Hong Kong prioritize LCCs and intercontinental routes; HKG third runway hits 120 million capacity.

Africa

Ethiopia and Rwanda invest in historic projects for connectivity.

Europe/North America

Istanbul and Dallas focus on terminals and runways amid congestion.

Challenges & Innovations

Congestion affects 66% of travelers, prompting AI, biometrics, and sustainable designs. Projects incorporate noise reduction (e.g., Barcelona's €3.2B runway extension) and green financing. Future success hinges on optimizing existing space alongside new builds.
